Mr. Mohammad Anwar  
General Manager  
PTT, Islamabad

Dear Mr. Anwar

This is in reference your discussion with American Embassy officers Mr. Horn, [redacted] Qureshi and [redacted] on 30 June on the matter of communications requirements for the Embassy's new radio monitoring project. In response to your request, following are the specific technical communications requirements needed for this project:

1. Two each 4-wire voice grade lines to be made available at House No. 47, Street No. 11, Shalimar 6/3, Islamabad.
2. Lines are to be used for transmitting audio from receivers and recorders from Islamabad to London. Output impedance of equipment is 600 Ohms. Audio will be fed at 0 Db level or level required by PTT.
3. Lines are for 24 hours per day, seven days a week use.
4. Audio is to be relayed from location in Islamabad via voice grade lines to PTT facilities for onward relay to satellite ground station in Karachi.
5. We would like PTT to be responsible for line testing and continuity of circuits to satellite terminal and our office location in Islamabad.
6. When audio signal is not being fed, we would require two-way "talk" capability on one line.
7. Arrangements for leasing satellite channels to London and for proper connections in the United Kingdom will be made by Department of State Officer in Washington and London.
8. Two lines for local telephone service.

We are planning to begin the operation of this project in late August, 1980. The undersigned will be the contact officer on this project (tel. No. 24071, ext. 337).

We are most grateful for your kind assistance and cooperation on this matter.

Sincerely yours

Walter C. Korn  
General Services Officer  
American Embassy  
Islamabad
